

# WAITER POS

Take table orders using an iPad mini that wirelessly prints to the kitchen.

Reduce errors and eliminate double handling by using a SASSCO Waiter POS solution for restaurants & cafes.

Give your staff a hand-held tablet to take orders right at the table. Tablets use the most advanced wireless technology and have a wide range.

## FEATURES

- **Works on any device**

Although it is super popular on iPad mini, our App works on any iOS or Android device.

- **Eliminate double handling**

Orders are processed only once, right at the table. Once sent, they appear on your POS.

- **Fast & Efficient**

Our Waiter POS App is super fast and does not rely on Internet and/or cloud hosting.

Reduce errors
